

## Basics

### It all starts somewhere

Introducing the **Basics range** of beds from CAPS.

The CAPS basics range consists of three innovatively designed roller beds that can handle a wide variety of batteries and roll off heights. The roller bed can also be **flipped** upside down to achieve lower roll off heights making it even more universal. These beds have been manufactured for applications where a customer only requires a few spare batteries and wants a bed that is value for money. The basics beds can be stripped right back or customised by adding and removing options.

### Time to add a charger.

The basics range doesn't just stop at a roller bed. CAPS offer two uniquely designed bolt on charger stands which can be mounted to the rear of the basics range roller beds.

Basics 101 bed allows a charger post which can accommodate chargers that can be back mounted with an option for use of retractor to keep cables tidy. Basics 102/3 provides an options for back mounted chargers or for a wooden charger shelf, which allows foot mounted chargers to be positioned easily.

## Basics 201

Rear mounting Charger post to suit Basics 101
